PILOT STUDY PROTOCOL

SATURDAY SHOPPING CENTER TEST

I. SUBJECT SELECTION

Filter cigarette smokers at random if we have supply of their type cigarette.

Take all pertinent (?) data on subjects - some payment/reward

II. TEST PROCEDURE

Cigarettes puffed with and without holders - extreme caution taken that dilution holes are in holder and as much filter tip exposed as possible.

Unlit for first subjects until test is running smoothly.

Lit on last 2 hours or so if unlit has gone well.

3 puffs with and without holders each cigarette model - plastic gloves for operator (?).

Change tips on holder on each subject.

PPA tape labeled - type cigarette
with or without holder
subject name/number

III. CIGARETTE MODELS

1. Smokers own brand - have cigarettes available
2. Barclay KS SP 1 mg nominal**, *
3. Long filter Barclay type*
4. Cambridge KS SP 1 mg*, **

ORDER (1) First in all cases
(2), (3), and (4) rotated

*Screened for dilution.
**Ring tipped
